

Integra Advanced Training

Overview

Integra Advanced Training

A decorative blue line that starts below the 'Integra' part of the title, curves downwards and to the right, loops around, and then continues as a horizontal line that connects to the bottom right corner of the main text box.

This training is designed for all participants who have already completed the basic training or have experience using the RF::Suite. This advanced training covers the specific features of the Integra standard to further expand your knowledge and skills.

You will learn how to optimally utilize the functions and capabilities of the Integra standard to make your projects even more successful. Practical examples and interactive exercises will provide valuable insights and deepen your understanding.

Whether you choose the online option or attend in person at our office in Weingarten, you'll benefit from a practical and engaging learning environment.

You'll also gain access to our EKS Hub, where new features and advanced content are presented through short screencasts and documentation.

CONTANT

Specialties of the Integra standard with RF::Suite:

RF::ViPer
RF::RobSim
RF::VPM

Creation of RF::ViPer
with RF::VPM

Functionblocks of the
Integra Library

Requirements

A basic training course must have already been attended or booked together, or sufficient experience in using the RF::Suite must be present.
