

Integra Training

Overview

Integra Training

A decorative blue line that starts from the bottom of the 'Integra' text, loops around to the left, and then curves upwards and to the right, ending near the bottom right corner of the main text box.

The training environment at EKS InTec GmbH provides you with customized knowledge building using the RF::Suite software for Virtual Commissioning (VC).

This interactive training course offers you an overview of the RF::Suite software landscape in the Integra Standard. During this three-day course, you will have the opportunity to build and commission a virtual plant of the Integra Standard using RF::Suite together with our experienced trainers. You will be introduced to all the necessary software functions for VIBN. These include, for example, creating projects, coupling software, and the correct use of the VIBN system.

Whether you choose the online option or attend in person at our office in Weingarten, you will benefit from a practical and engaging learning environment.

In addition, you will receive access to our EKS Hub. Here, new features and further content will be presented to you using short screencasts and documentation.

Content

RF::Suite Basics:

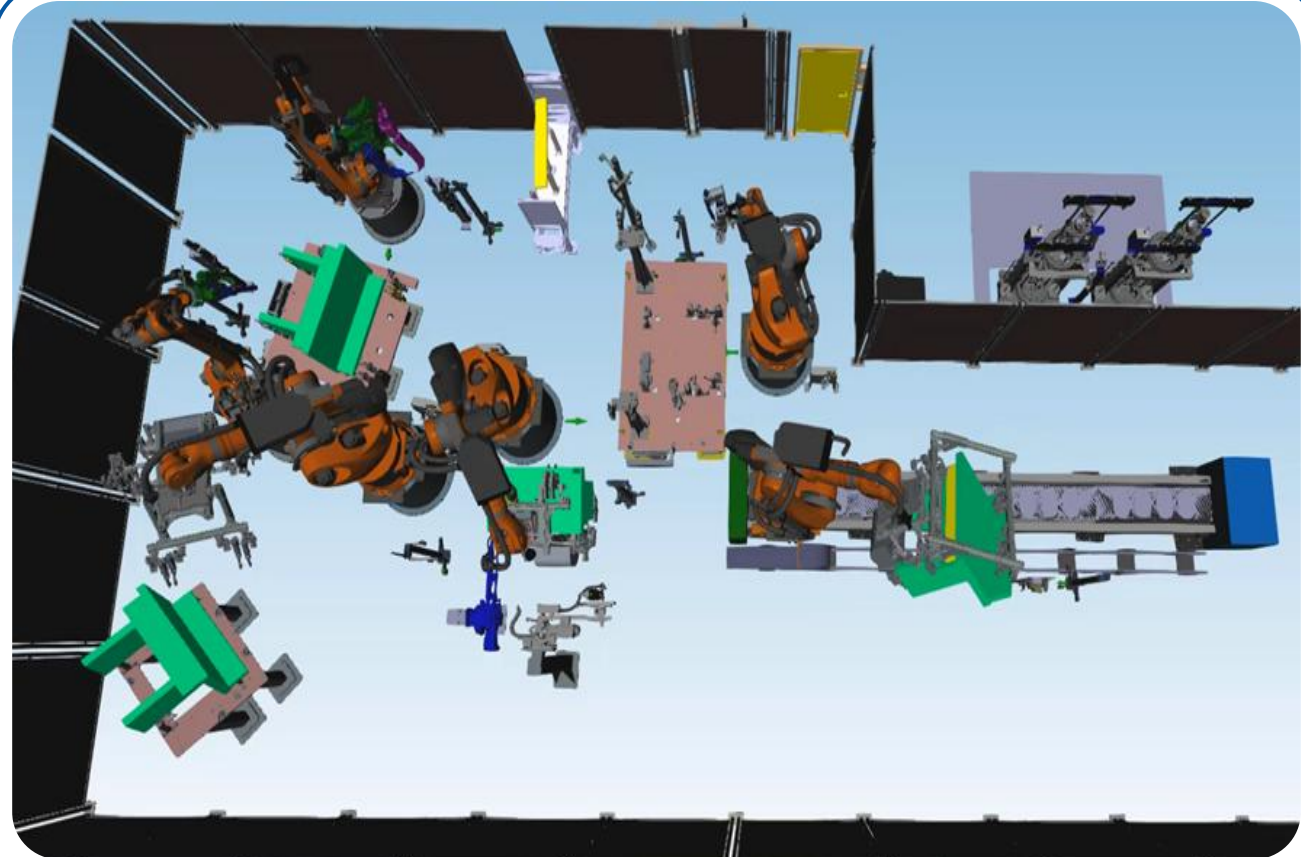

- RF::ViPer
- RF::YAMS
- RF::RobSim
- RF::MAX²
- RF::VPM

Setting up a virtual plant (training cell) with RF::Suite

Commissioning the self-built training cell

Tips & Tricks for RF::Suite (EKS Hub and Tutorials)

Specialties in Integra Standard

This plant is prepared and put into automatic mode during the IntegraTraining.

Requirements

No special prior knowledge is necessary. Experience in control engineering, robotics, or commissioning of automation systems is helpful.

Hardware

For the training, each participant will be provided with a computer to which they can connect remotely.

The training plant will be set up together on these computers.

Target Groups

- Decision-makers
- Planners
- Programmers, project engineers and commissioning engineers
- Maintenance and service personnel
- Innovators

Duration

The Integra training course is scheduled for **three** days.

Language

German, English

Maximum number of participants

5
